DB BROWSER SETUP

1. Go to <https://sqlitebrowser.org/dl/>
2. Download DB Browser by clicking the link applicable to the device and OS, then **Click Next.**

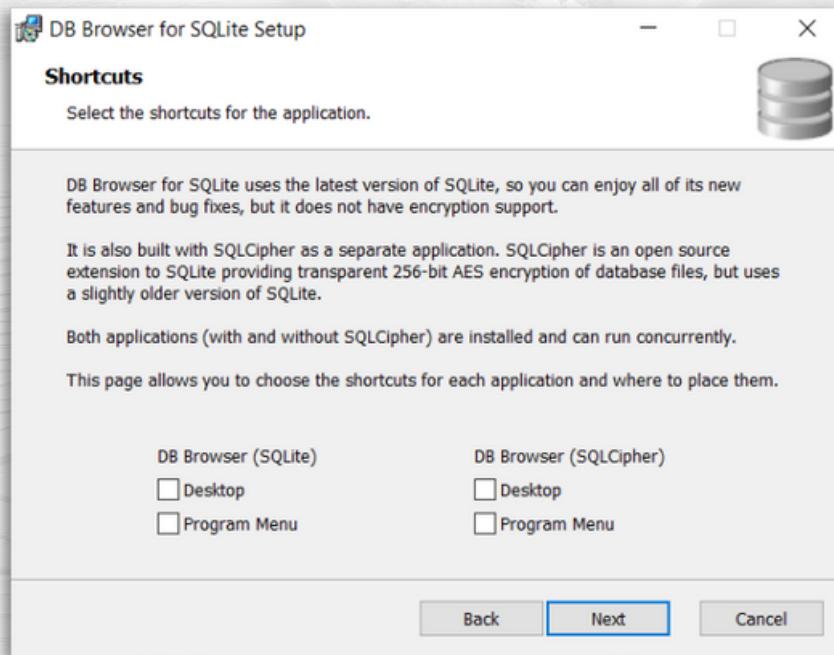

3. Click on the **Checkbox**. Then, click **Next**.

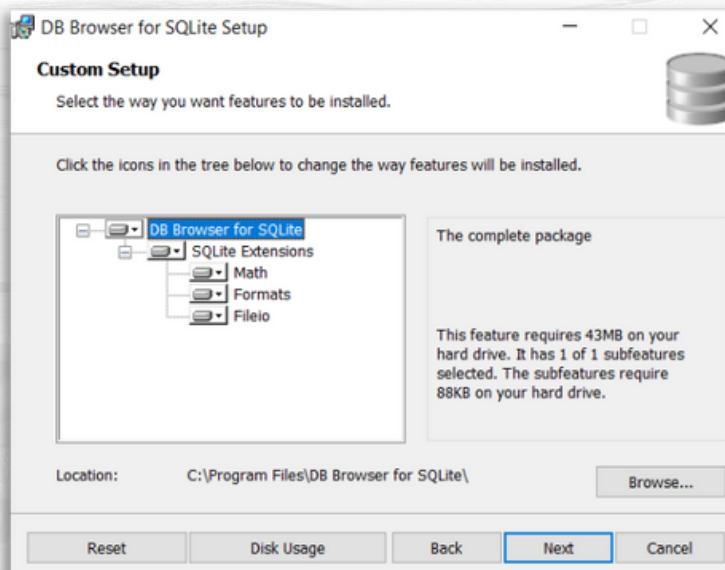

DB BROWSER SETUP

4. Click on the **Checkbox**, if you wish to add a shortcut of the DB Browser. Then, click **Next**.

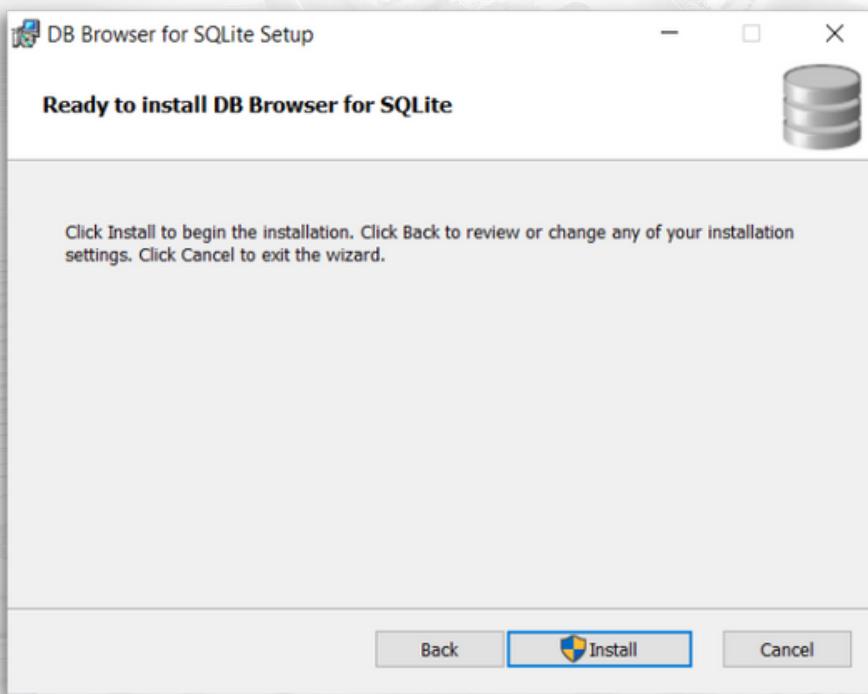

5. Click **Browse**, if you want to change the setup location. Then, click **Next**.

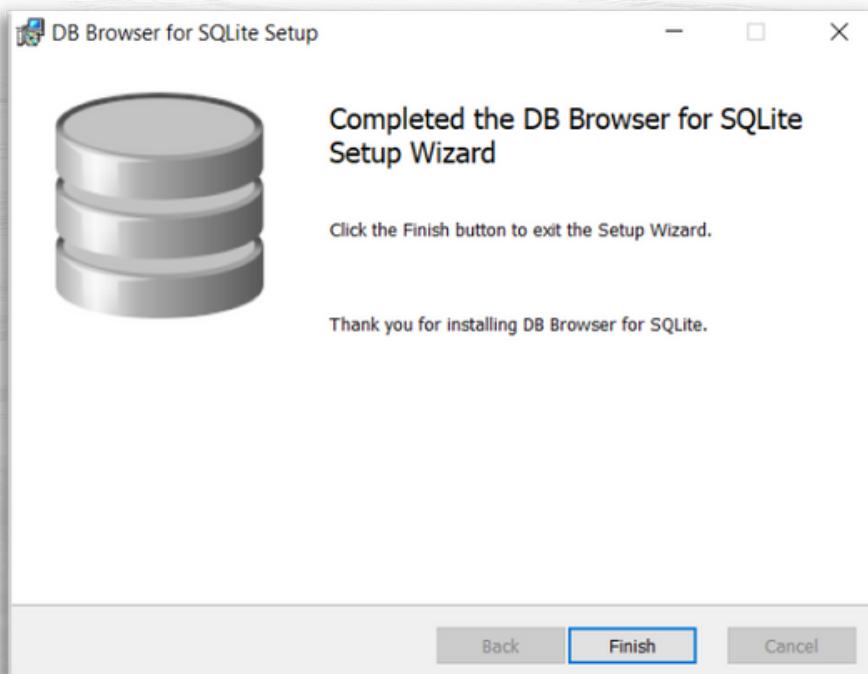

DB BROWSER SETUP

6. Click Install

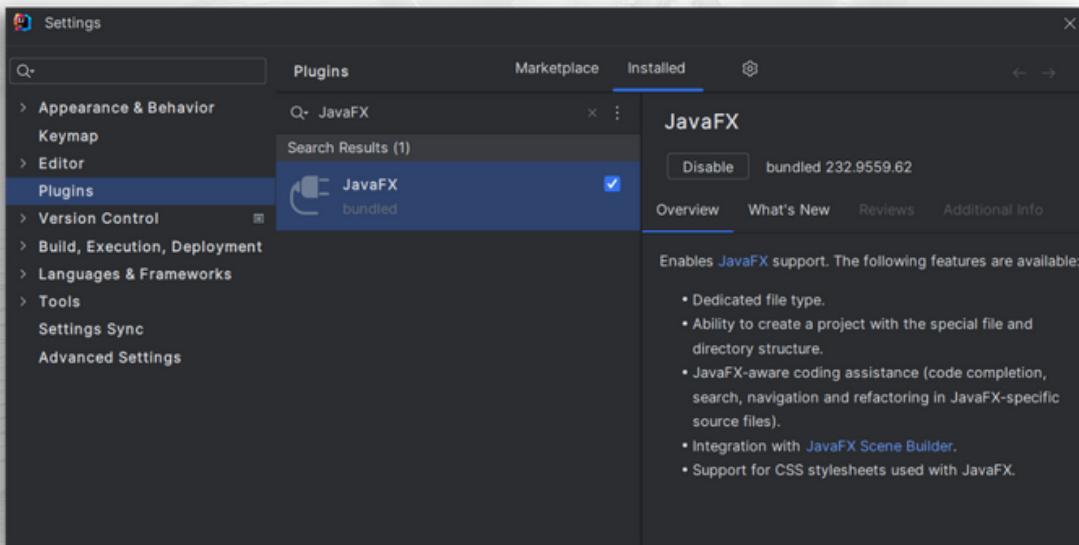

7. Click Finish

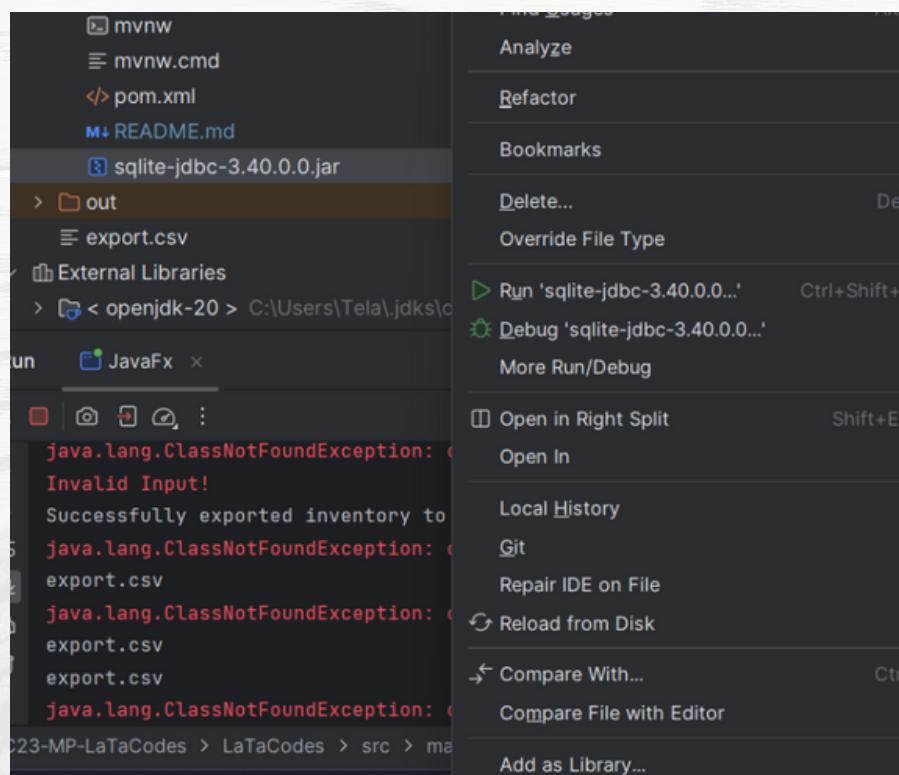

INTELLIJ SETUP

The program utilizes JavaFX. Therefore, make sure that the IntelliJ on your device already has JavaFX plugin installed.

Now open the project, and right-click on sqlite-jdbc-3.40.0.0.jar and select Add as Library... at the bottommost part. After that, you can finally run the application.

USER INTERFACE

This section offers a detailed overview of the application's visual components, guiding users through the layout, design, and functionalities of the graphical interface. It explains the purpose and usage of each element, focusing on efficient interaction with input fields, buttons, menus, and other UI components. Topics include data input, and command execution, ensuring users grasp how to navigate the application's graphical interface seamlessly.

HOME PAGE OVERVIEW

MENU

Upon clicking, the user will be guided into the menu page of the application. The menu page features the food and drinks that are available in LaTacodes. Each product's sample photo is displayed as well as its list of ingredients

MENU PAGE OVERVIEW

Item	Description
TANGO TACOS	Beef, Onions, Chili Powder, Pickles, Salt, Garlic Powder, Cheddar, Wheat Pita
QUESADILLA LOCA	Chicken, Tomato, Cheddar Cheese, Jalapeño, Cilantro, Heavy Cream, Butter, Pickles
BRAVO BURRITOS	Chicken, Beef, Cumin, Onion, Garlic, White Rice, Cilantro Leaves, Lime, Salsa, Pita
ENCHILADA EXTRAVAGANZA	Beef, Tomato Sauce, Beans, Chicken Broth, Flour, Garlic, Onion, Paprika, Cumin, Cayenne, Cheese

TIESTA BEBIDAS	Vodka, Tequila, Lemon, Margarita, Jalapeño, Orange, Strawberry, Sprite, Lime, Salt

The user may also access the inventory and home page from the menu page, or close the application using the exit button.

INVENTORY

Upon clicking, the user will be guided into the inventory page of the application. The inventory page is where the user can manage and view the stocks of the restaurant. The user can add, delete or export ingredients in a csv file. The application uses an sql database to store the ingredient list data.

INVENTORY PAGE OVERVIEW

A screenshot of the inventory management application's interface. At the top, there is a navigation bar with the logo "LA TACODES" on the left and three buttons: "HOME", "MENU", and "EXIT" on the right. Below the navigation bar, there is a search and filter section. It includes fields for "SKU", "NAME", "CATEGORY", "BRAND", "AMOUNT", and "TYPE / DESCRIPTION". There is also a "CLEAR" button and a "Search" icon. To the right of this section is a table header with columns: SKU, NAME, CATEGORY, BRAND, AMOUNT, UNIT, and TYPE / DESCRIPTION. Below the table header, a message "No content" is displayed. At the bottom of the screen, there are several buttons: "Enter .csv file name", "BULK ADD", "ADD ITEMS", "ADD STOCK (SKU)", "USE STOCK", "USE STOCK (SKU)", and "DELETE ITEM".

SKU - unique identifier per item/ingredient

Name - name of the item/ingredient

Category - classification of item/ingredient

Brand - brand of the item/ingredient

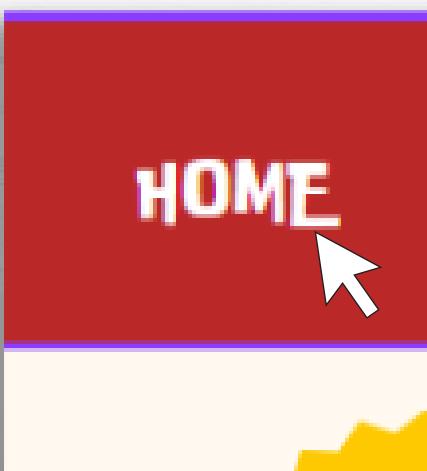

Type/Description - information and details about the item/ingredient

EXIT

Clicking on the exit button will initiate an automatic termination of the program, prompting the user to exit the application. Exit buttons are also conveniently located within the Menu Tab. This design facilitates a seamless exit process, contributing to the restoration or resetting of memory.

RETURN TO HOME

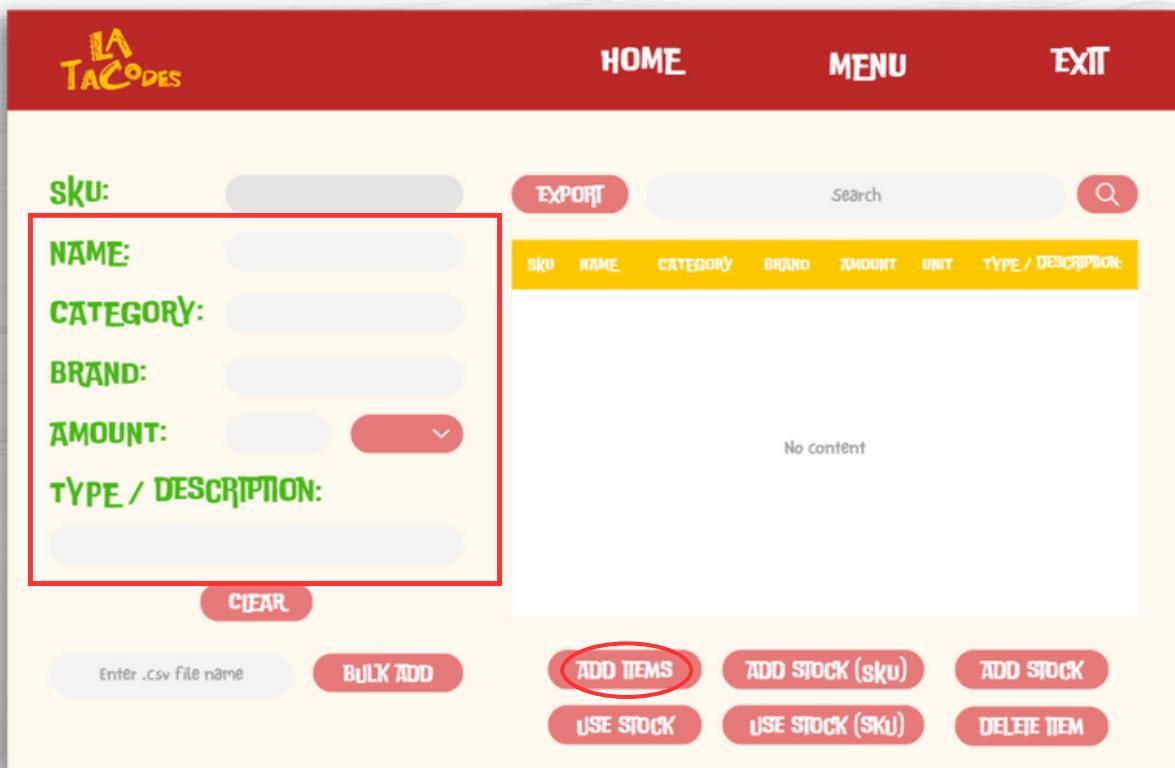

The Home button is visible in both the Menu and Inventory Tabs. By clicking on it, you will be redirected to the Home page, offering a convenient method to navigate to other tabs and explore additional features within the application.

ADD INGREDIENTS

To add a new ingredient/item:

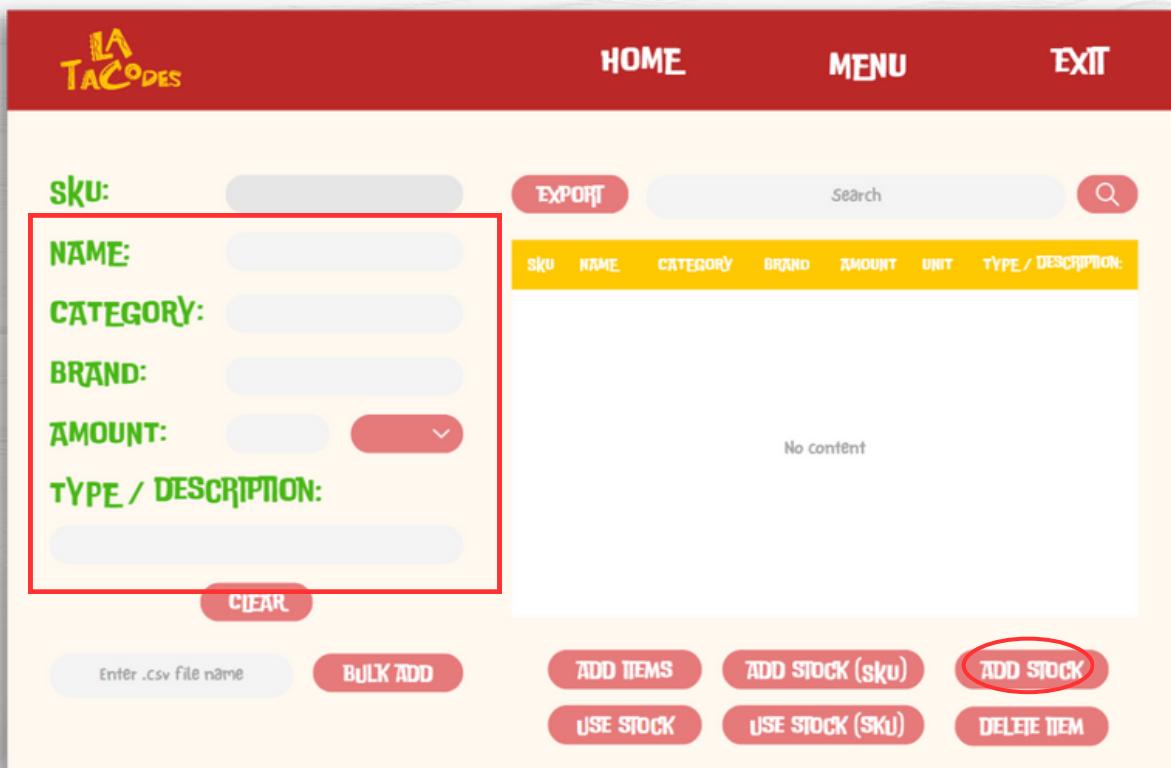

1. Fill in name
2. Fill in Category
3. Fill in Brand
4. Fill in Amount
5. Fill in type/description (optional)
6. Click “Add Items”

ADD STOCK

To add more of an existing ingredient/item:

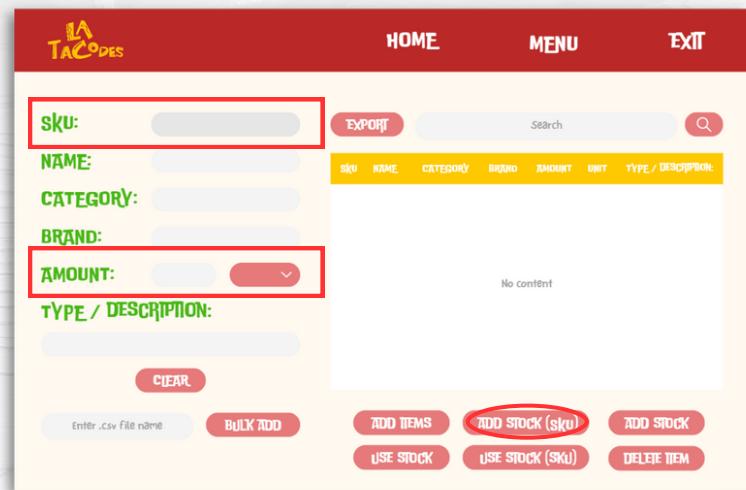

1. Fill in name
2. Fill in Category
3. Fill in Brand
4. Fill in Amount
5. Fill in type/description (optional)
6. Click “Add Stock”

ADD STOCK (SKU)

To add more of an existing item/ingredient, the user may opt to fill in its SKU

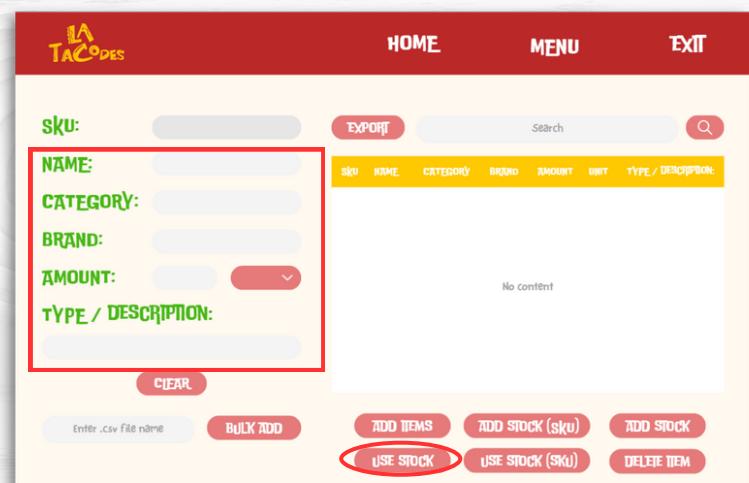

1. Fill in SKU

To add ingredients in bulk from a CSV file:

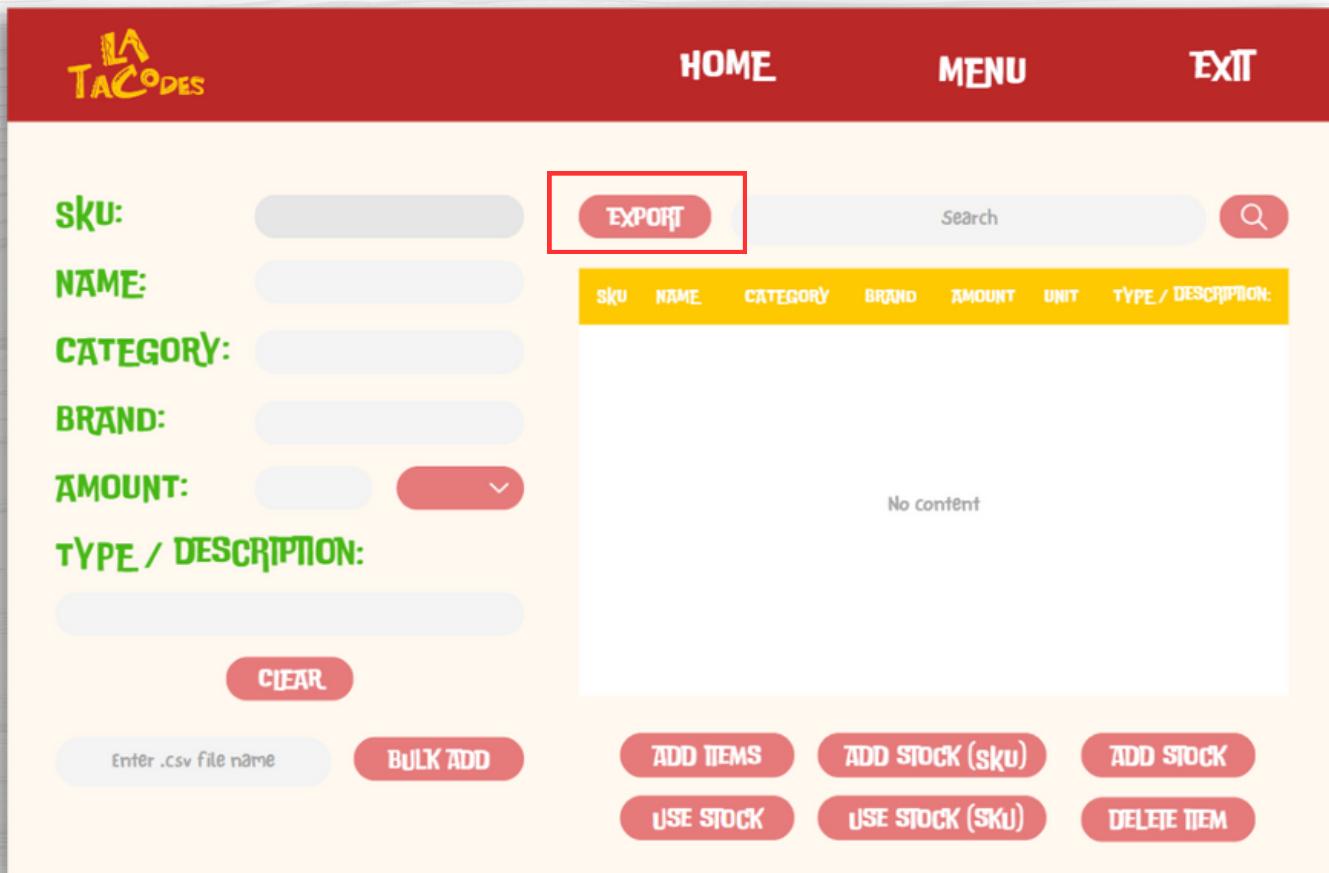

1. Enter the CSV file next to the “Add Bulk button”
2. Click “Add Bulk”

EXPORT

To export item/ingredients list in a CSV file

1. Click the “Export”

SEARCH

To search for an ingredient/item in the inventory,

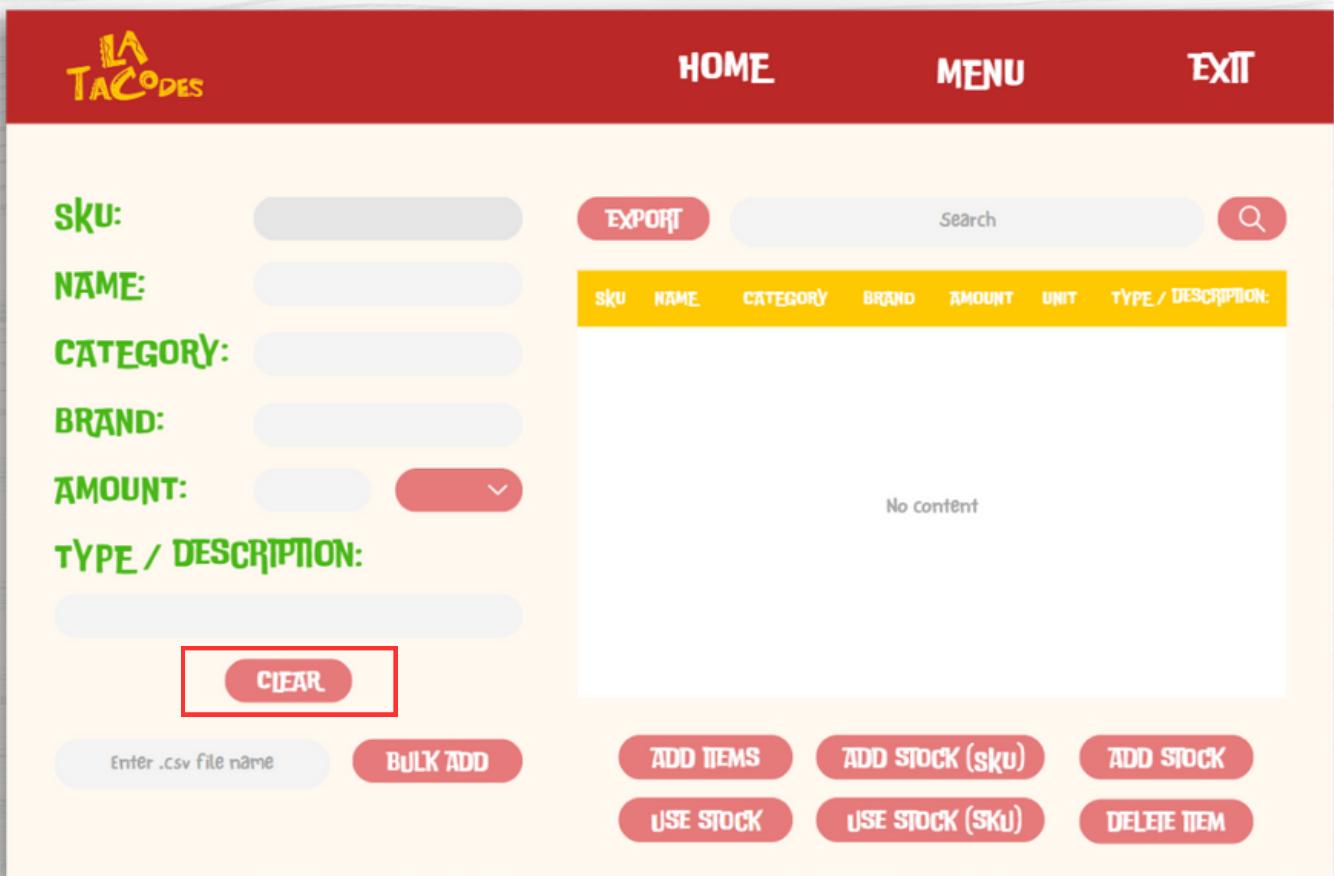

1. Click on the search bar on the top left
2. Click the magnifying glass button (Search)

The screenshot shows the La TACOdes inventory management software interface. At the top, there is a red header bar with the logo "LA TACODES" on the left and navigation options "HOME", "MENU", and "EXIT" on the right. Below the header, there is a search bar with a placeholder "Search" and a magnifying glass icon. To the left of the search bar, there are several input fields for filtering: "SKU:", "NAME:", "CATEGORY:", "BRAND:", "AMOUNT:", and "TYPE / DESCRIPTION:". Below these input fields is a "CLEAR" button. On the right side of the search bar, there is an "EXPORT" button. Underneath the search bar, there is a table header with columns: "SKU", "NAME", "CATEGORY", "BRAND", "AMOUNT", "UNIT", and "TYPE / DESCRIPTION". A message "No content" is displayed in the center of the table area. At the bottom of the screen, there are several buttons: "Enter .csv file name", "BULK ADD", "ADD ITEMS", "ADD STOCK (SKU)", "ADD STOCK", "USE STOCK", "USE STOCK (SKU)", and "DELETE ITEM".

CLEAR

To clear the ingredient text fields on the left,

1. Click on the clear button.
